Marsden M-600: Weigh immobile patients with this simple, portable hoist attachment

Specification

Capacity/graduations: 200kg x 100g

Dimensions: 630mm (W) x 275mm (H) x 160mm (D)

Power: Mains/rechargeable battery

Battery life: Upto 3000 weigh-ins (or 55 hours of continuous use)

Weight of scale: 6kg

Attaches straight to your hoist

The M-600 is designed for use with coat hanger style spreader bars

The M-600 is a lightweight Class III hoist weighing attachment designed for use with hoists. It's an ideal solution when a floor or column scale, or even wheelchair scales, cannot be used.

This hoist weighing scale is designed to clip onto your coat hanger shaped spreader bar hoist easily. Then, attach your sling to the hooks on the bottom of the scale to weigh your patient.

The clear, digital display shows the weight of the patient to the nearest 100g, up to a capacity of 200g.

The M-600 is also portable: it weighs just 6kg, and can also be purchased with a carry case.

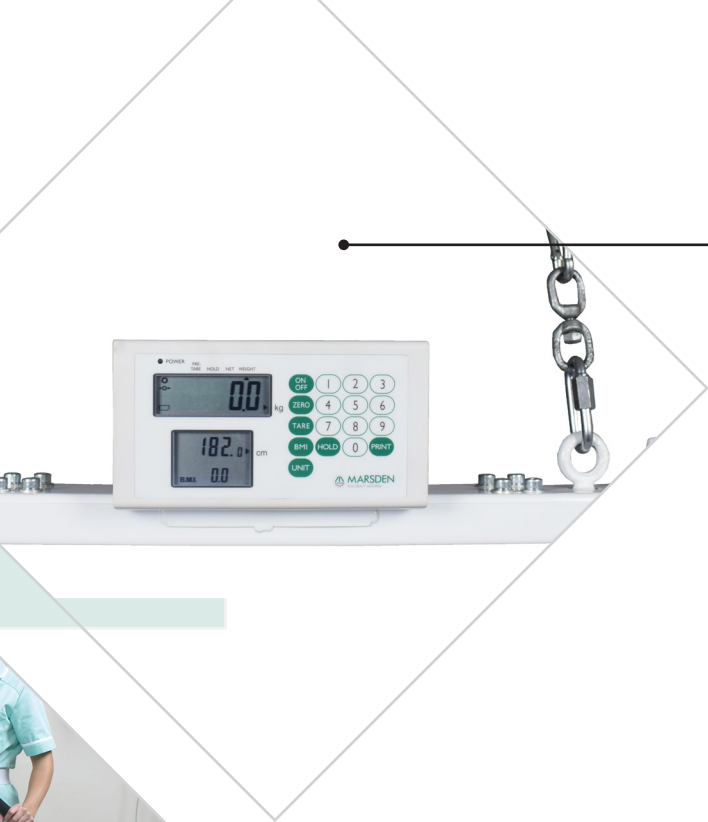

Easy to use

Intuitive functions help speed up weighing

The M-600 boasts an all numeric keypad which means you can type in a patient's height, and get their BMI reading instantly.

Two LCD screens means weight and BMI results are clearly laid out for you. Plus, choose the optional printer and get a hard copy of the patient's readings.

Medically Approved

Class III Approval ensures high accuracy for medical use

Any weighing scale used for medical purposes should be Class III Approved. The M-600 is Class III Approved and conforms to medical weighing equipment regulations.

Hoist weighing attachments are required by MHRA to be approved under the Medical Devices Directive (93/42/EEC). The Marsden M-600 is MDD approved making this, and the Marsden M-605 the only hoist weighing attachments that are legal for use in the UK.

Features such as Hold (use this to stabilise the patient's weight reading on the display) and Tare (remove unwanted weight to leave a true weight reading for your patient) allow you to accurately weigh your patient easily.

Four year warranty

Industry-leading peace of mind

The Marsden 4 Year Warranty demonstrates our belief in the quality and reliability of the M-600. How many other manufacturers offer such a generous warranty period on a Class III Approved medical scale?

Additionally, a Marsden service and recalibration contract is available to keep your scale accurate and reliable.

Accessories available

Carry case for ultimate portability

Thermal printer to print patient weight, height and BMI

Wifi/Bluetooth connectivity to futureproof your scale

Marsden service contract for accuracy/calibration checks

Marsden M-600: Key features at-a-glance
