What is the V-100?

The V-100 is Marsden's best-selling veterinary scale. It is a 100kg capacity scale, perfect for weighing small to medium sized pets, particularly cats and dogs.

This scale features from Tare and Hold functions and a clear digital weight display to ensure that all users, whether you be in a veterinary surgery or at home, are able to obtain accurate weights.

Easy to clean

In order to help make the V-100 incredibly diverse and suitable for veterinary surgeries, we have designed the product to be wiped down.

Even though the device does not hold an IP rating, the platter can be wiped down without causing damage to the scale. Making it a clean and hygienic addition to any surgery.

Lightweight and portable

The V-100 has been designed with the ease of the user in mind. Whether it be within a veterinary surgery or at home, this is the ideal scale.

Weighing only 8kg, the scale is easy to transport around the veterinary surgery, from room to room. Or when used at home it is slimline enough to be stored in small and compact spaces.
