Power: Mains adaptor or 6 x AA batteries

Battery life: Upto 6000 weigh-ins (or 100 hours of continuous use)

Weight of scale: 3.4kg

Easy to use

Instant, high accuracy weight readings

The M-420 is Marsden's bestselling medical floor scale.

It's been a big seller for years because it's easy to use, it provides high accuracy readings and is built to last.

The M-420 is ideal for all hospital wards and departments, with its robust build suitable for constant daily use. Accuracy to 50g means nurses can get high accuracy weight readings for monitoring, treatment and diagnosis purposes.

This high accuracy is also essential when weighing diabetic patients, calculating weight for specific antibiotics, for prescribing medication and for weighing children.

Robust and portable

Scales that are built to last and can be taken anywhere

The M-420, along with all the scales in our M-4XX range, has been designed to be the most robust portable scale available.

A reinforced aluminium structure saves weight but increases strength, therefore prolonging life. An optional carry case provides extra portability, and battery life is an impressive 100 hours of continuous use.

High accuracy

Suitable for almost any patient

The M-420 is, with its 50g accuracy, suitable for almost any medical application. In most cases this accuracy is even suitable for weighing children.

A 220kg capacity means it can be used to weigh most patients.

Simple features like Tare (to remove unwanted weight from the display) and Hold (to stabilise the weight reading on the display, so you can take a note of it) mean you can improve weighing accuracy further with minimal effort. The weight reading can be flipped, too - so that it's either readable to the patient, or the healthcare professional.

Extra portability

The optional carry case makes it even easier to transport the M-420

Choose the CC-400 and your Marsden M-420 is even easier to transport.

Marsden carry cases are tough and designed specifically for our scales.

Accessories available

Remote display for discreet reading of weight

Carry case for easier transportation

Marsden service contract (UK only) for accuracy/calibration checks
